

**LANDSCAPE ISSUES - MATRIX OF HIERARCHICAL STEPS TO MANAGING PESTS**

This matrix is to be used in conjunction with the Eugene School District 4J Landscape Management Guidelines

This is a matrix that identifies a pest problem or issue and defines approved practices for proper control. The goal is the safest, least toxic, and cost-effective methods of control.

The director of 4J Facilities Management or his/her designee must approve any additional strategies before they are used.

**Site personnel must always consult Facilities Management prior to taking action against pests on District property.**

**TERMITES**

Termites inflict damage to wood building structures. While the design of new district buildings makes them less prone to these insects, older building frequently suffer infestations which need to be addressed.
